

STEM

2017 SUMMER CAMPS

Hands-on STEM Experiences

Learning has never been so fun! Campers will get to stretch their minds with math exercises, build robots that can be brought to life with DIY programming & design their own video games! These innovative programs are sure to make a life-long impact that give your child an EDGE with essential 21st century skills. Each program and project is a unique blend of real-world education and engaging play that everyone is sure to love.

For campers entering grades 1-8

The "Write" Way to Learn

Whether you're looking for a place your struggling writer to improve or your aspiring author to shine, our writing camp is the place to be! Our "Fantastic Fiction" program explore various forms of writing from narratives to persuasive articles to poetry. We'll also review the key processes that turn an idea into a published work. Your camper is sure to find their voice -- and a great time -- during this week-long workshop.

For campers entering grades 3-8
